CURRENT TOPICS.

A new bill has been introduced in the Senate by Senator McHenry, which would make it a crime for any person to sell or give away any article of value for the purpose of procuring votes at an election. The bill is intended to prevent the kind of bribery which has been so common in recent years.

YUKON GOLD FIELDS.

The Yukon gold fields are still producing a large amount of gold. The latest report from the government geologists shows that the output for the first six months of the year was over \$1,000,000.

NEW FEATURES.

The new features of the proposed constitution for the State of Kentucky are being discussed by the convention. The features include a new system of electing judges and a new system of electing members of the legislature.

FIFTY-FIFTH CONGRESS.

The Fifty-fifth Congress of the United States is now in session. The House of Representatives is led by Speaker Cannon, and the Senate is led by President McKinley.

McKENLEY STATE NEWS.

President McKinley is expected to visit the State of Kentucky in the near future. He is expected to visit Louisville and then travel to other parts of the State.

ANOTHER BUNCO GAME.

A new bunco game has been discovered in the city of Louisville. The game is being played in a small room in a building on Main Street.

THE TWO HANNAS.

The two Hannas, Senator Hannan and Representative Hanna, are both expected to be re-elected to their respective offices in the next Congress.

THE LARGEST SINGLE ORDER FOR

W. I. Moody, Iowa's greatest creamery operator, estimates that it costs an average of 10 cts. per 100 lbs. to haul milk to a creamery and haul the skim milk away again. He is going to save all this by placing with his patron, Daisy Separators, and have cream and milk for the cream.

In this way the farmer will get the full advantage of the Separator and creamery systems, will have the warm fresh skim milk for his stock feed and will not be at the mercy of the market.

Before ordering these 50 separators, valued customers were told the merits of all the different Dairy Separators on the market were very thoroughly explained by Mr. Moody.

It was finally decided that the Sharpless Separator was the best separator available. It was the most desirable and best made machine, and though costing a little more than the others it was worth the extra cost because of the difference asked, and the order was given to that company.
